Various levels of Identity

National

The purpose of this Act is to govern the collection, use and disclosure of personal information by organizations in a manner that recognizes both the right of individuals to protect their personal information and the need of organizations to collect, use or disclose personal information for purposes that a reasonable person would consider appropriate in the circumstances.

Provincial

Regional

**Indigenous Nation**

Community

Family

Individual

Community Development and Nation Rebuilding

"Rebuilding our Nation One Person at a Time"

*Strong, healthy **citizens** and **communities**, speaking our languages and celebrating who we are and our history in our ancestral homelands, working together, managing our lands and resources as a self-sufficient, **self-governing Nation**.*

# Managing Identities

Illustration 1: Identity Management

Citizen Identity Management is the process of ensuring that citizen information stored in different places can be matched to the proper citizen!

To acquire a complete picture for a person, the identity of other related entities, such as address, also need to be matched to the proper entity and person. This mapping is one of the responsibilities of Data Administration.

Matching People with Services

Extract Transform Load (ETL)

Extract Transform Load refers to a three step process that involves:

- Extract is the process of reading data from one or more sources.
- Transform is the process of converting the extracted data from its previous form into the form. This may involve applying a series of rules or conversion functions.
- Load is the process of writing the data to an end target.

Why does the FNHA need to know you REALLY are you?

- FNHA has inherited client lists; we need to ensure that these lists are correct.
- FNHA is mandated to provide the following services:
  - Support our Research and Analytics requirements
  - Health Benefits Services
  - Program Planning and Evaluation
  - Supporting First Nations led research agenda, activities and research collaboration with its health and wellness partners *(internal and external to the FNHA).*
  - FNHA is mandated to improve the health and wellness of First Nations communities.
    - Improved community information
    - Enable First Nations to do health planning
    - Identifying strengths and gaps
    - How to best invest in health and wellness
- FNHA is also mandated to provide the following:
  - Access to accurate and most up to date client information at the point of care / service
 - Ability to be connected to the BC Health Systems
