14.7% of toxic drug poisoning deaths between Jan-June 2024 were First Nations people.

First Nations Health Authority
Health through wellness

This data includes only Status First Nations people and their status-eligible descendants. Additionally, our data is limited to biological sex at birth, which may misidentify two-spirit, transgender, non-binary, intersex, and gender diverse people. Surveillance data is dynamic and subject to change with new information and historical corrections.

The FNHA gratefully acknowledges the health partners that make this data available: BC Centre for Disease Control, BC Coroners Service, BC Emergency Health Services, and the BC Ministry of Health.

You may find this information distressing. Cultural support is available at Tsow Tun Le Lum Society. Call 1-888-403-3123 (toll-free) or visit www.tsowtunlelum.org

Toxic Drug Poisoning Events involving First Nations People

296

TOXIC DRUG POISONING EVENTS EXPERIENCED BY FIRST NATIONS PEOPLE BETWEEN JAN-JUNE 2024.

This is a increase of 5.3% from 281 events experienced during the same period in 2023.

Rate of Toxic Drug Poisoning Events involving First Nations People

6.6 x

First Nations people experienced an event rate 6.6x higher than other residents of the region between Jan-June 2024.

Events of First Nations People BY SEX

Events of First Nations People BY AGE

First Nations People are Disproportionately Represented in Toxic Drug Poisoning Events

First Nations people make up 4.5% of the region's population.

22.5% of toxic drug poisoning events between Jan-June 2024 were First Nations people.

NOTES

- Most toxic drug poisoning events are non-fatal and represent instances where paramedics were called and responded to a poisoning. Events that were treated successfully in community and events where 9-1-1 was not called are not captured in this data
- Event data is only collected for people with documented BC Personal Health Numbers (PHNs), and is therefore likely an underestimate, due to missing PHNs for some events
